Repair Service

We offer a cost effective repair service for any type and brand of ophthalmic surgical instrument, and for most types of phacoemulsification handpieces.

Instructions for use. Reprocessing instructions.

Product instructions for use, decontamination instructions, plus various product statements and company certificates are available www.altomed.com.

Microwash Custom Trays

We are able to offer a totally bespoke instrument tray solution to help you keep your delicate instruments safe and secure during decontamination processes.

For information about Microwash see page 83, or go to www.microwash.net.

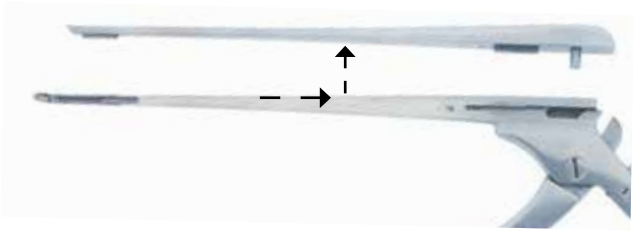
- **A4550** 90° 3mm, right cutting
- **A4551** 90° 4mm, right cutting

Images not to scale

To Dismantle:

1. Close the handle and then pull back the release trigger.

2. Carefully slide back the moveable arm and separate from handle.



Important! Ensure the two parts of the device are kept together and are not separated from one another. Each arm is custom made for each handle.

To Reassemble:

After cleaning, lubricating and sterilising, reassemble the punch by aligning the Slip Plate with the Slip Groove and insert the Retaining Pin into the Retaining Slot. Carefully close the handle and push back the Release Trigger into the closed position.

The Crawford Lacrimal Intubation System

This is a simple procedure designed by the late J.S. Crawford, M.D, which speeds up the process of inserting a lacrimal stent with less trauma and tearing of the nasal floor.

Indications for lacrimal intubation:

1. Where probing of the lacrimal system has not cured the tearing.
2. Where there are definite obstructions of the lacrimal system that would close if they were not kept open.
3. Repair of injuries involving cut canaliculi.
4. During a dacryocystorhinostomy.

28-0184 Crawford intubation system with suture
Two flexible stainless steel probes (0.40mm diameter wires) with an olive shaped tip at one end, with the other ends joined by a length of silicone tubing (outside diameter 0.64mm, inside diameter 0.30mm). This version of the Crawford lacrimal intubation set contains a 6-0 braided silk suture within the silicone tube lumen.

28-0185 As above but without suture

28-0174 Crawford II intubation system with suture
Two flexible stainless steel probes (0.40mm diameter wires) with an olive shaped tip at one end, with the other ends joined by a length of silicone tubing (outside diameter 0.94mm, inside diameter 0.51mm). This version of the Crawford lacrimal intubation set contains a 6-0 braided silk suture within the silicone tube lumen.

28-0175 As above but without suture

Sterile

28-0186 Crawford retrieval hook
Used to pick up the probe (after insertion) under the inferior turbinate in the nose.

28-0189 Anderson-Hwang grooved director
This grooved director greatly simplifies retrieval of the olive tip probe. The grooved director has the following advantages:

Minimizes trauma and bleeding of the nasal mucosa.
Greatly simplifies the intubation technique by trapping the olive tip probe.
Allows infracture of the inferior turbinate if required.

The grooved director also simplifies placement of tubes during a DCR. The olive tip of the Crawford set may be engaged either under direct visualization or with an endoscope.

28-0190 Crawford tubing stripper
Used to cut and remove excess tubing from the silk suture.

Note: Intubation sets are supplied sterile and are Single Use products. The hook, stripper and grooved director are intended to be sterilized at the hospital and can be reused provided they are not damaged.

CDCR Tubes

Our range of implantable pyrex glass tubes is intended for use in CDCR procedures. There is a wide variety of styles, with a selection of flange diameters and tube lengths, each tube being manufactured to our customers specifications.
Please refer to the Altomed price list for guidance.

Lester Jones Tubes, Straight and Angled

Manufactured from 2.2mm diameter pyrex borosilicate glass tubing with a 3mm, 3.5mm or 4mm flange.
Manufactured with a bevel at the nasel end.
Order code LJ_ _ _ _

Gladstone Putterman Tube

Similar to a Lester Jones tube but has a second cone-shaped flange 4-6mm behind outer 3mm, 3.5mm or 4mm flange. This has been developed to prevent tube migration. When ordering quote distance to 2nd flange.
Order code GP_ _ _ _

Callahan (Cox) Tube

Manufactured from 3mm pyrex tubing, normal flange diameters 4.5mm or 5.5mm, has no nasal end bevel.
Order code CC_ _ _ _

Double Collar Tube

This is a straight Lester Jones tube with a flange at both ends, supplied with either 3mm, 3.5mm or 4mm flange and minimum lenth of 12mm.
Order code DC_ _ _ _

Ordering Guide

LJ3509 Lester Jones tube, 3.5mm flange, 9mm length.
LJ4015AHF Lester Jones tube, 4mm flange, 15mm length, angled, with suture hole, frosted.
DC3017F Double collar tube, 3mm flange, 17mm length, frosted.

A11908S Polyethylene tube, sterile (pack of 5).
A11930 Plastic storage tray with labelled compartments (not autoclavable).
A11932 Blue anodized aluminium autoclavable sterilisation tray.
A11934 Blue anodized aluminium identification scale for tubes.
A11936 Pack of 5 Jones nylon cleaning rods (not autoclavable).
A11937 Lester Jones gold dilator No.I 1.7mm and 1.9mm arms.
A11937A Lester Jones gold dilator No.II 2.2mm and 2.4mm arms.
A11937B Lester Jones gold dilator No.III 2.7mm and 2.9mm arms.

Polyethylene Tube

Jones Gold Dilators

In response to the mechanical difficulties observed during conjuctivo-dacryocystorhinostomy, a set of instruments was developed by C.W. Cox Jr, to make the procedure technically easier with less trauma to the patient, and successful functioning of the tube more likely. With the cooperation of oculoplastic surgeons, notably Dr Alston Callahan, the modern Cox System has been developed.

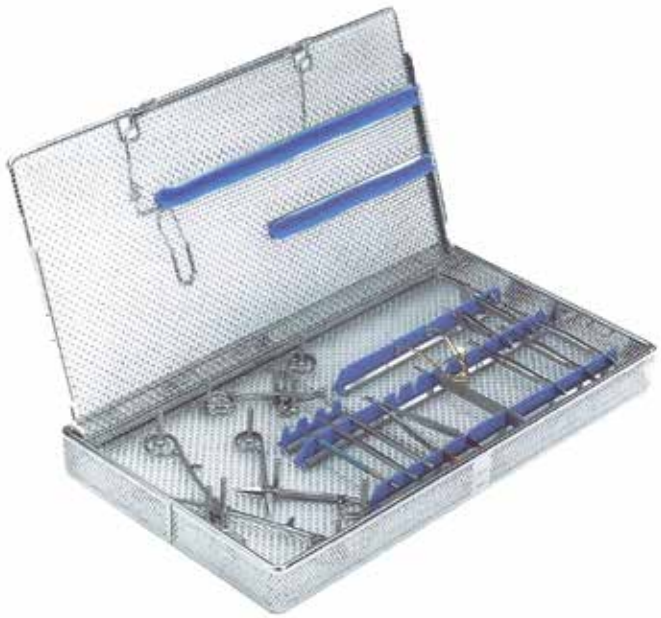
A9314
Microwash tray
445 x 255 x 80mm
(1 DIN, double deck)



Microwash trays enable microsurgical instruments to be washed and sterilized using modern automated methods. Microwash trays accommodate instruments securely, preventing damage during handling, whilst also allowing fluid spray penetration. The trays range from 75mm up to 460mm, with the option of single or double layers. The internal components are custom made to secure each individual instrument.

Microwash trays are supplied with laminated placement sheets which enable easy identification of instruments.

The Crawford Lacrimal Intubation System

28-0184
Crawford intubation system with suture
Two flexible stainless steel probes (0.40mm diameter wires) with an olive shaped tip at one end, with the other ends joined by a length of silicone tubing (outside diameter 0.64mm, inside diameter 0.30mm). This version of the Crawford lacrimal intubation set contains a 6-0 braided silk suture within the silicone tube lumen.

28-0185
As above but without suture

28-0174
Crawford II intubation system with suture
Two flexible stainless steel probes (0.40mm diameter wires) with an olive shaped tip at one end, with the other ends joined by a length of silicone tubing (outside diameter 0.94mm, inside diameter 0.51mm). This version of the Crawford lacrimal intubation set contains a 6-0 braided silk suture within the silicone tube lumen.

28-0175
As above but without suture

For Crawford hook and associated instruments please refer to page 45.

A7669A
Flute handle, active or passive aspiration

Each

A7671/10S
Replacement backflush tubes

Pack of 10

Vitreoretinal

A9520A
Damato Endo illuminator, angled, 20G (Occutome fitting)

A9520AC
Damato Endo illuminator, angled, 20G (Constellation fitting)

Box of 10

Accessories

A2080
Nettleship dilator

Reusable

A5908
Jewellers forceps,
No.5 110mm

Reusable

Blades and Knives

A1702
Scalpel handle, No.3

Reusable

Box of 100

A1704
No. 10 scalpel blades

A1706
No. 11 scalpel blades

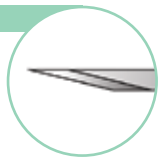
A1710
No. 15 scalpel blades

A1725
Metal handle,
for Single Use blades

Reusable

Box of 12

A10130
Blade and tip,
15°



A10134
Blade and tip,
30°

A10136
Blade and tip,
45°

Blades and Knives

A10150
Sclerotome blade,
Type 57

A10154
Sclerotome blade,
angled Type 66

Box of 6

A10080
20G V-Lance

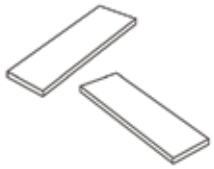
A10157
Sclerotome knife,
Type 57

A10182
Crescent knife,
angled,
bevel-up

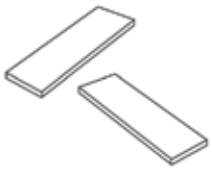
Box of 6

Cellulose and PVA Products

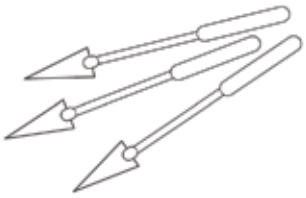
A10002
Cellulose strip,
7mm x 35mm
Box of 500
(10 x 50)



A10016
Cellulose strip,
7mm x 35mm
Box of 150
(15 x 10)



A10014
Cellulose point
Box of 500
(10 x 50)

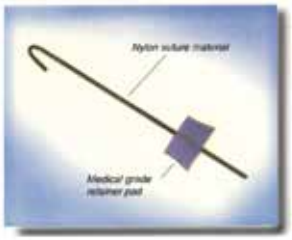


A10000
Altomed Cellulose
spear
Box of 200
(20 x 10)

A10010
Altomed Cellulose
points
Box of 250
(25 x 10)

A2271
Iris retractor set

Set of 5



A2273
Iris retractor set

Set of 4

A10060
Eye shields,
clear, universal,
blister pack

Box of 100
